

SUMMARY

**Linara Ishkildina. The experimental investigation of articulatory and acoustic features of the Bashkir phonemes /ç/ (/θ/) and /ʒ/ (/ð/)**

The author discusses the articulatory features of the Bashkir specific phonemes /ç/ (/θ/) and /ʒ/ (/ð/) analyzed by innovative experimental methods. The dialectal data concerning these phonemes and their positional allophones are also considered in the article.

*Keywords:* Bashkir, phonetics, experimental phonetic research, dialectology, consonants

**Andrey Kubatin. The Old Turkic titles in the Sogdian documents from Mug Mount**

In the Sogdian documents of the first quarter of the 8<sup>th</sup> century found on Mug Mount (Tajikistan) there are Old Turkic names, titles, terms, directly and indirectly related to the Turkic Khaganate. Despite the fact that there is original information on the history of the Turkic peoples, in particular the Western Turkic Khaganate, in the documents, it was not studied by turkologists and historians. One of the reasons for this fact is controversial reading and interpretation of the terms in the first publications.

*Keywords:* Sogdia, Western Turkic Khaganate, Mug Mountain, Panch, Divashtich, the Old Turkic titles, personal names, ethnonym

**Alevtina Lobanova, Alexander Chernykh. Terms of traditional clothing in the Komi-Permyak dialects**

The article presents the analysis of the terms of clothing in the Komi-Permyak language. In the article the functional and semantic features of the common and dialectal lexemes are identified. The authors also deal with the etymology of the words from the lexical group. The ways of borrowing to Komi-Permyak are considered too.

*Keywords:* Komi-Permyak, terms of clothing, common vocabulary, dialectal vocabulary, original lexicon, loanwords

**Ekaterina Logunova. Writing system of the Korean language of 18<sup>th</sup> century**

The article presents a complete description of the 18<sup>th</sup> century Korean writing system, which is noticeably different from today's Korean. The description includes both "reading rules" and "writing rules", providing free transition between a word written in Korean alphabet and its phonological transcription. Some peculiarities of the 18<sup>th</sup> century Korean writing system are presented in this paper for the first time (e. g. orthographic rules of syllabic clustering and spelling of aspirated consonants).

*Keywords:* Korean, writing texts, writing system, morphophonology, phonology, orthography

**Yulia Normanskaya. The origin of the Khanty vowel system**

The author of the article suggests a new hypothesis of the origin of the Khanty vowels. After E. Khelinski, who proved that in the Khanty dialects vowels of the first syllable were affected by *U*- and *I*-umlauts which are presented nowadays in some dialects, the author assumes that similar umlauts were also at the stage of formation of Proto-Khanty from Proto-Finno-Ugric. This hypothesis allows to describe the genesis of the Khanty vocalism practically without any exception.

*Keywords:* Khanty, Proto-Finno-Ugric, umlaut, vocalism, comparative and historical linguistics

**Anna Dybo, Badma Salaev, Svetlana Trofimova. His way in science (on the 75<sup>th</sup> anniversary of Valentin I. Rassadin)**

In the paper the authors study Valentin Rassadin's role in the research on the Mongolic and Turkic languages, including endangered ones.

*Keywords:* the Mongolic languages, Buryat, Kalmyk, the Turkic languages, Tofa (Tofalar)

**Ivan Stenin. The Finno-Ugric languages: Fragments of the grammatical description. Formal and functional methods / Ed. by Ariadna I. Kuznetsova**

The author considers articles from the book "The Finno-Ugric languages: Fragments of the grammatical description. Formal and functional methods" (Moscow, 2012). The author pays attention to the main advantages and disadvantages of the articles.

*Keywords:* the Finno-Ugric languages, linguistic expeditions, grammar, Mari, Udmurt, Komi-Zyrian, Erzya Mordvin
